North end of Sculptor's Dream I placed a candle on the floor and left it burning. We then went on to Council Chamber and entered the Collesium Route V. I. A. the Alpine way. At the top of the Alpine Way We went North East through an unnamed avenue to th large Room mentioned in the t exploring trip. Just after ot to the room I took the party ne by one) and showed them the light that I left in the North end of Sculptor's Dream 75 feet below us. The visitors were very well pleased with this sight and we named t the "theight of fame".
