## **Employee/Guide and Certifications List**

Use the table below to provide the names and titles of all owners, managers, employees, and guides. Proof of these certifications must be uploaded to the portal and attached to every CUA application. This list must include all guides who enter Isle Royale National Park.

A current CPR and Basic First Aid (or higher) certification is required to provide any guided service in the park. Food Handler certifications are required for all guides who pack and/or prepare food for nonpersonal use. If clients are responsible for their own food packing and preparation, please put, "Not Applicable" in this column.

If, at the time of application, staffing is not currently completed, the applicant must still upload this form with the following statement completed:

staffing is not currently complete. commits to ensuring all guides meet CUA certification requirements prior to entering Isle Royale National Park (Park). understands that an updated guide list and/or documentation of required certifications must be submitted to the Park upon request.
