Name _____

Date _____ Time _____

Entered into eBird?

Morristown NHP has been setup as several “hotspots” in eBird. By entering your checklist on their website, you’ll give the park a more complete picture of bird usage within its borders. See more at www.ebird.org.

U.S. Department of the Interior
National Park Service

Morristown National Historical Park

Bird Checklist

Potential bird encounters in Morristown NHP throughout the year.

Seasonality

S spring March - May
S summer June - August
F fall September - November
W winter December - February

* Detected during NETN volunteer breeding bird surveys or otherwise confirmed nesting in park.

Chance of Detection:

A - Abundant: Occurs in moderate to large numbers and easily found in appropriate habitat.

C - Common: Found in moderate numbers and usually easy to find in appropriate habitat.

U - Uncommon: Small numbers and usually, but not always, found with some effort in appropriate habitat.

R - Rare: Occurs annually in very small numbers or in a very restricted habitat. Difficult to find.

O - Occasional: Found some years, but not every year.

Blank spaces either indicate species absence or insufficient data.

All species in checklist were compiled using I&M Northeast Temperate Network (NETN) forest breeding bird monitoring data, eBird, and NPSpecies information as of 9/2017. For more about breeding bird monitoring in the park, see <http://go.nps.gov/netn-birds>
