

Annual Percentage of Rainfall Compared to the 37-year Running Average from 1987-2023

Percentage of water year rainfall from 1987-2023 compared to long-term running average based on data from Point Reyes National Seashore Bear Valley (Olema OVYC1) weather station. The rainfall data is a sum of daily rainfall for each water year October 1–September 30. Two additional local weather stations, BBEC1 (located on Mt. Barnabe), or Point Reyes Station (Marin County OneRain 38029) were used to fill in any data gaps.
