

**Dr. Kimberley
Rain Miner**

she/her

**Climate
Scientist**

Dr. Kimberley Rain is a climate scientist who grew up exploring the outdoors in Boulder, Colorado. She works in the Arctic to predict and understand the worst impacts from climate change. Outside of science, Kimberley loves to hike, kayak, and play with her cattedog Darby!

**Dorothy
Tovar**

she/her

Microbiologist

Dorothy Tovar is a microbiologist who got interested in diseases after getting a parasite while in Haiti. She is a PhD candidate at Stanford University where she studies viruses that infect bats. Outside of science, Dorothy loves to channel her creativity through her many different hair styles.

**Dr. Ronda
Hamm**

she/her

Entomologist

Dr. Ronda Hamm is an entomologist who grew up in Fresno, CA loving all furry animals. She combines her passion for education and science by sharing the importance of insects and all they do for us. Outside science, Ronda enjoys traveling and captures the amazing diversity of animals and landscapes through photography.

**Stephanie
Taylor**

she/her

**Wildlife
Biologist**

Stephanie is a wildlife biologist who grew up in the foothills of the Sierra Nevada mountains. At the Bureau of Land Management, she works with government and research partners to ensure that the plants, animals, and their habitats are maintained or improved for future generations. Outside of science, Stephanie enjoys crafting, hiking, and watching MST3K with her husband and their cat!

**Nicole
Ornelas**

she/her

Park Ranger

Nicole Ornelas is a Park Ranger who grew up in a multi-ethnic home. Within the County of San Diego, she shares her passion for the natural world through education and conservation.

Outside of science, Nicole loves to stay active and travel with her loved ones.

**McKenna
Pace**

she/her

**Science
Educator**

McKenna Pace is a science educator who grew up in the mountains of northern Utah. At work, she inspires and empowers high school students to succeed in science classes and pursue STEM careers. Outside of teaching, McKenna likes to spend time in nature, learning about and celebrating the world around her.

**Alex
Warneke**

she/her

**Science
Communicator**

Alex Warneke is a science communicator who grew up frolicking in the California Kelp Forest. Using art, music, digital media, and education, she spans boundaries to translate science in ways that are accessible, inclusive, and fun. When not working to making science look epic, Alex can usually be found hitting the trails or summiting the tops of very high mountains.

**Kelly
Robinson**

she/her

**Evolutionary
Biologist**

Kelly Robinson is a PhD student who grew up in southern Wisconsin. At school, she studies the evolution and ecology of toxins and toxin resistance in reptiles and amphibians.

Outside of science Kelly loves photography, and camping and hiking with her dog.

**Dr. Linh Anh
Cat**

she/her

Ecologist

Dr. Linh Anh Cat is an ecologist who grew up watching the amazing wildlife of Florida. At Cabrillo National Monument, she manages natural resources, like coastal sage scrub and tidepools. Outside of science, Linh Anh loves reading, hiking, and diving.
