

FINDING AID

The Chetro Kettle man worked ingeniously to rot-proof his logs—
one of the best preservative jobs in history

Pre-historic Handy Man

By Gordon Vivian

MANUSCRIPT COLLECTION 1861-2006

Prepared by
Chaco Culture National Historical Park
National Park Service
2012

Catalog Number: CHCU 113502

Accession Numbers: CHCU ACC - 0587, 014, 808

COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

HISTORY

Created in 1994 as an assembled collection containing manuscripts relating to Chaco Canyon. Manuscripts and reports relating to specific Chaco Center projects that were originally cataloged under this accession have been recataloged under the appropriate project accession number. A wide variety of items acquired by donation and purchase from a variety of sources became part of the manuscript collection, including published books, photocopied articles, etc. In 2010, 49 published books were removed from the Manuscript Collection and incorporated into a non-museum property reference collection. Most of the items were donated to the Chaco Archive over the past twenty years.
