Dr. Anderson is gaining hands-on experience in using a resistivity meter. This meter, often used for engineering and environmental purposes, can yield information to archeologists that will lead to uncovering structural foundations or artifacts currently hidden from view. This and equipment such as the magnetometer, terrain conductivity meter, and ground-penetrating radar were demonstrated during a Remote Sensing/Geophysical Techniques for Cultural Resource Management course, at Fort Laramie, WY, June 1993. A DIRECTORY OF TRAINING OPPORTUNITIES IN CULTURAL RESOURCE MANAGEMENT (SHORT TERM)

OCTOBER 1993—DECEMBER 1994

Compiled by:

Emogene A. Bevitt, Dahlia V. Hernandez, Sylvia Rose Augustus
Preservation Assistance Division

We are pleased to present the fourth *Directory of Training Opportunities in Cultural Resource Management (Short Term)*. Short term refers to the length of the courses listed, with six weeks being the maximum.

The CRM is regularly sent to Federal Preservation Officers, State Historic Preservation Offices, National Park Service parks and regional offices, national and regional preservation organizations, preservation programs at colleges and universities, certified local governments, tribal leaders and cultural centers.

Extra copies of this directory have been printed and are available for use at workshops and conferences, as well as for individual use. Single copies will also be sent to professional journals and newsletters, along with an information release to encourage these organizations 1) to let their readers know how to obtain personal copies, and 2) to excerpt entries that are of interest to their readers. We encourage others to make use of this information and to bring courses on cultural resource management topics to the attention of possible training participants.

THIS YEAR'S DIRECTORY

This directory identifies workshops, courses, seminars, and other short classes in cultural resource management topics sponsored in the United States and Canada from October 1993 through December 1994. It lists training opportunities located in 46 states, the District of Columbia, Puerto Rico, the Virgin Islands, the Marshall Islands and two provinces in Canada. Information for the directory was obtained from a survey mailed to CRM readers and nearly 1,000 representatives from Federal, State and local governmental agencies, universities, organizations, and educational institutions.

The directory is composed of two sections. The first and largest section, **Course Listings**, provides descriptions of each course. **Course Listings** is organized by Federal agencies (F), State agencies (S), Universities or Colleges (U), and Other Organizations (O). The listings are arranged alphabetically based on the organization sponsoring the course. Course sponsors appear in bold typeface within the address of the contact.

LISTING FORMAT

Course Title
Code Number
Date and location course offered, if known
Cost/co-sponsor
Course Description
Proposed Audience/Participants
Person to Contact, Course Sponsor, Address, Telephone Number
Topics to be covered in Course

The first citation for each entry is the course title followed by a code number used (in this directory only) to identify the course in the Indexes section. Generally the course sponsor has developed a course for a specific audience, and these courses may or may not be available to others who are interested but outside of targeted organizations. The "Participants" information indicates whether non-agency personnel may attend. As noted, the courses listed take place over a relatively short period of time.

The succinct course descriptions characterize the key elements of a course. TBA (To Be Announced) has been used when exact information was not available. Class size varies from 20-50, though some of the "hands-on" courses may allow only a very limited number of students due to the necessity for individual instruction. A few courses can accept several hundred participants. Unless otherwise stated, the cost listed is for the course fee or tuition costs only. It is the responsibility of the participant to pay for the travel to and from the course, hotel, meals, etc. This Directory provides a starting point only. Write or call for complete course descriptions or to determine class size and availability.

The second section, **Indexes**, contains five indexes that enable the reader to find course information using the code number. The indexes provide the opportunity to search for a course based on topic, location, time of year, agency sponsor or title.

Listing in this directory does not imply endorsement of the content, the instructor or the course sponsor by the National Park Service, U.S. Department of the Interior. While every effort has been made to provide accurate information, scheduled training may change at any time, and early contact with the sponsor is advised. If you are aware of additional training sources, please let us know.

The schedule for the Directory will change in the next edition to match the calendar year (i.e. January-December 1995), pending availability of publication funding. The deadline for entries will be September 21, 1994. The survey form is on pages 82-83. Contact Ms. Bevitt with entries or for further information.

ACKNOWLEDGEMENTS

This directory is an effort of the Preservation Assistance Division (PAD). This publication was made possible, in part, with special funding by the National Park Service through its Cultural Resources Training Initiative.

Special thanks go to all the survey respondents for their participation; to Dover Publications, Inc. for graphics; to Pam Allen, Martha Howell, Kari Koester, Marilou Reilly, Terry Robinson, Mike Rogers, Lesley Slavitt, Sandy Thomas, Judy Wagner and Kay Weeks for their help at key points in this endeavor; and to Rowland Bowers, Flip Hagood, Blaine Cliver, Ward Jandl, Karl Esser, and Ron Greenberg for their encouragement and support.

FOR INFORMATION ABOUT OTHER COURSES IN CULTURAL RESOURCES

Degree Programs

For those interested in a listing of degree programs in historic preservation, the National Council for Preservation Education publishes an Education Supplement each October in the National Trust for Historic Preservation's *Historic Preservation News*. Contact your local library or the:

National Trust for Historic Preservation
1785 Massachusetts Ave. NW
Washington, D.C. 20036
202-673-4000.

For a more indepth view, *The Directory of College, University, Craft and Trade Programs in Cultural Resource Management (Long Term) October 1992*, developed as a joint project of the National Park Service and the National Council for Preservation Education, provides information about training programs or education programs that last from 6 months to several years. With information about 75 programs—faculty, tuition, curriculum, degree/certificates offered, length of program and whom to contact for further information—the directory is intended for students at the high school or college undergraduate level (and their counselors and advisors). Readers are also referred to 23 supplemental guides or directories for information regarding additional programs. For information regarding cost contact:

National Council for Preservation Education
210 West Sibley Hall
Cornell University
Ithaca, NY 14853
607-255-7261.

Preservation Crafts and Trades Training Programs

Those interested in a listing of preservation crafts and trades training will find a listing of programs or schools prepared by the National Council for Preservation Education in the Education Supplement of the October issue of the National Trust for Historic Preservation's *Historic Preservation News*. Contact your local library or the:

National Trust for Historic Preservation
1785 Massachusetts Ave. NW
Washington, D.C. 20036
202-673-4000.

Some information on craft and trade programs is also available in *The Directory of College, University, Craft and Trade Programs in Cultural Resource Management (Long Term) October 1992*. (See reference under **Degree Programs**.)

International Training Opportunities

Information on courses offered by the International Center for the Study of Preservation and Restoration of Cultural Property (ICCROM), Rome, Italy (commonly referred to as the Rome Center), may be obtained from:

Publications Assistant
Advisory Council on Historic Preservation
1100 Pennsylvania Ave. NW, Suite 809
Washington, D.C. 20004
202-606-8503.

For information on other international training opportunities consult the published "Short Courses Abroad in Historic Preservation" prepared by the United States Committee of the International Council on Monuments and Sites (US/ICOMOS). Copies may be requested from:

US/ICOMOS
1600 H St. NW
Washington, D.C. 20006
202-842-1866.

Training Ideas for Architects

Those interested in developing training for architects can find examples of successful training programs in a monograph series entitled *Architectural Education Initiative* and another monograph series on critical urban and regional design issues. One monograph, *Outstanding Education in Practice*, reports on award-winning training programs. For information on these monographs and on national conferences on these topics, contact:

Joseph Bilello, AIA
Education Services Department
American Institute of Architects
1735 New York Ave. NW.
Washington, D.C. 20006
202-626-7358.

National Park Service COURIER

The official, complete listing of courses offered by the National Park Service (primarily for its employees) is the *COURIER Special Employee Development Issue*. Distributed each January, this publication lists cultural resource topics including archeology, anthropology, historic architecture, historic landscape preservation, curation and related fields. The *Courier* also provides information concerning various issues endemic to training in the National Park Service. To request a copy, contact:

Employee Development Division
P.O. Box 37127
Washington, D.C. 20013-7127
202-523-5280.

National Park Service Cultural Resources Training Initiative

Over the last several years, the National Park Service has received additional funding to undertake cultural resources training pursuant to Section 101(h) of the National Historic Preservation Act Amendments of 1980. The increased funding has given the National Park Service an exciting opportunity to expand its existing training activities to reach new audiences at the Federal, State and local levels. Approximately 50 training endeavors have received funding (including the publication of this directory). See listing F-26 for contact information regarding special courses that may be funded in Fiscal Year 1994.

ADDITIONAL WAYS TO FIND TRAINING

While this Directory and the introduction suggest a number of possibilities in training sources, the interested person may have to do some further investigation to find the course that meets his/her needs or interests. This directory represents a good beginning, more than a definitive, all-inclusive resource for training in cultural resource management. Information regarding regionwide training activities can be obtained from an organization such as:

Northeast Document Conservation Center
100 Brickstone Square
Andover, MA 01310-1494 508-470-1010

In addition to offering courses for professional librarians and archivists, they can provide information about other course offerings in the area.

Professional organizations often will sponsor specific courses throughout the country for both their members and for the public. The National Recreation and Park Association, with additional offices in five areas of the country, publishes a calendar of training in recreation, parks and leisure services. The address is:

National Recreation and Park Association
2775 South Quincy Street, Suite 300
Arlington, VA 22206-2204 703-578-5549

If you know of places that have a concentration of cultural resource professionals, check and see if a lunchtime lecture series exists. For those coming to Washington, DC, the Historic American Buildings Survey and Historic American Engineering Record (HABS/HAER) of the National Park Service often offer a lunchtime lecture from a visiting or resident expert. [Contact Dean Herrin at 202-343-9633.] Other organizations sponsor similar single lecture opportunities to learn more about a variety of topics related to the preservation of cultural resources but may not advertise these talks widely due to limitations of space in the lecture area.

Check with local academic institutions for class offerings. Colleges that offer degree programs in cultural resource areas will often allow individuals to take a class without enrollment in a degree program.

In addition, the people and organizations listed as contacts in this directory are a useful starting point in tracking down more information about training in the subject area that they are offering. Even if the date for a course may have past, those that provide training are frequently familiar with the availability of future training. They may themselves have scheduled additional courses that did not meet the deadline for this directory.

Check the "Bulletin Board" section of future issues of *CRM* for information on recent notices of training offerings and conferences with training sessions.
