

## **Student Projects**

Film or video projects that are being produced as a requirement for an accredited course can be issued a student filming or video permit. The student must provide:

- Name of educational organization and Tax exempt Number
- Course name and number
- Instructor's name

Because many park sites have scheduled other activities on weekends, the student should plan in advance and have alternate dates in mind when applying for a student film permit. NPS has designed the student permit to minimize the costs by eliminating many of the activities that generate the need for intense monitoring.

### Student projects may not involve:

- Access to interiors of structures not available to the public
- Night filming
- Set construction
- Oversized vehicles or equipment
- Pyrotechnics, firearms, or weapons (real or fake), or stunts
- Generators/artificial lighting
- Foggers
- Playback or sound exceeding 70 decibels
- Animals
