COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

HISTORY

The maps, plans, and drawings at Haleakalā National Park tell the story of the roads, trails, and structures built in the park since its establishment as a section of Hawaii National Park by Congress under the authority of the Antiquities Act in 1916. In the early 1930s, increased visitation to the Haleakalā Section necessitated the establishment of a road to the summit. Built in such a way that the crater would remain hidden until vehicles reached the top, the road was officially opened in 1935. In 1933, under the authority of the Emergency Conservation Work Act, President Franklin D. Roosevelt established the Civilian Conservation Corps (CCC) in order to give young men jobs and a source of income during the Great Depression. From 1934 to 1941, the CCC operated camps at Haleakalā. They completed natural resource conservation projects and toiled to improve public works. From 1941 to 1946, in response to World War II, Haleakalā was used by the military. An army base camp was built near Pu‘uniauniau and various radar systems were installed at the summit. Most of the military buildings and installations have since been removed, but some are still used by park staff to this day. From 1956 to 1966, a ten-year development project known as Mission 66 enabled the improvement and construction of infrastructure in national parks across the country. Under this program, Haleakalā National Park was able to construct both a new park headquarters in 1958 and the Red Hill Observatory in 1963. In 1961, Hawaii National Park was separated into Hawai‘i Volcanoes National Park and Haleakalā National Park. But that’s not the only change Haleakalā has seen in terms of land mass. The park has grown in acreage multiple times since then, adding Kīpahulu District, Nu‘u, and Denman land parcels to name a few. The Kīpahulu District is located on the southeastern side of Haleakalā along the coast. This area is an important moku in East Maui for being a site of great battles between the chiefs of Maui and the chiefs of Hawai‘i Island and for the large Hawaiian population that thrived prior to western contact. The area supported traditional Hawaiian farming of kalo and ‘uala (sweet potato). Fishing was also an important part of the area because of the abundance of marine resources. Ko‘a (fishing shrines) were constructed to mark fertile fishing areas. The Kanekauila heiau (temple) that is partially on NPS lands, aligns to Mo‘okini heiau on Hawai‘i island. It is thought to be a navigational guide across Alenuihāhā Channel. The area is also known as the home of the god Laka, who is worshipped by canoe makers. Kīpahulu District was also home to early Hawaiian homesteads established as a result of the Mahele. Starting in 1880s, sugarcane production became prominent throughout the Kīpahulu District, which brought a diverse range of immigrants to the area. When sugarcane production stopped in the 1920s, ranching became the dominant industry until the 1960s. In 1969, sections of Kīpahulu were added to Haleakalā National Park. Later in 1999 the Ka‘āpahu and Puhilele lands were also added to the park. Nu‘u is located on the southern side of Haleakalā. Between the 1400 AD-1600 AD the Nu‘u ahupua‘a located within Kaupō Moku on the eastern side of Haleakalā, was a center of activity on Maui and a well-populated place. The area was famous for its sweet potatoes and taro production thanks to the rich volcanic soil. In the 1700s, King Kekaulike, the mō‘ī (king) of Maui, resided in the area and was said to have farmed and fished there. His son was later born at Nu‘u. The area continued to thrive up until the 1800s. The population began to decline due to the introduction of Western diseases as well and the movement of population centers to Lāhaina and Honolulu. The area was home to an ancient loko (fishpond), a landing at Nu‘u Bay, an ancient heiau, a Protestant school and church, and a Catholic church. The community relied largely on farming sweet potatoes, fishing, and salt gathering, and later cattle ranching into the mid-20th Century. In 1848, 12,140 acres, or the entire ahupua‘a of Nu‘u was awarded to Kaleimoku, a lesser chief descended from Kekaulike, during the Mahele. By the end of the 19th century, James Campbell acquired half of Nu‘u Ahupua‘a from Queen Kapi‘olani. NPS acquired the NPS parcel from the Campbell Trust in 2008. The Denman Parcel in the park's southern section is a 17-

acre parcel within Naholokū Ahupua‘a in Kaupō Moku. The parcel was part of a much larger Native Hawaiian cultural landscape, which included sweet potato terraces, house sites and small heiau (temples), and is referenced in stories of Maui ali‘i (chiefs). The parcel may have been home to a Catholic school and church in the early historical era and was later granted to Helio Punihele in 1889. The land then passed to the Marciel family in the early 20th century and was used as a cattle ranch within the larger Kaupo Ranch. The land was sold to Gilbert M. Denman in 1958. Denman worked with Haleakalā National Park to sell the parcel to the NPS upon his death in 2004.

DESCRIPTION This collection contains the maps, plans, and drawings created for Haleakalā National Park. Materials include topographic maps, quadrangles, archeological base maps, trail maps, blueprints, construction plans, utility drawings, boundary maps, site plans, and land parcel maps. These records serve as an administrative record of the maps, plans, and drawings created for Haleakalā National Park. The collection dates from 1869 to 2021. Some of the material is undated. The bulk of the material dates from 1930 to 2000.

ORGANIZATION The collection is arranged into four series: Series 01: Hawaii National Park, Series 02: Haleakalā National Park, Series 03: Kīpahulu District, and Series 04: Island of Maui. Series 01 and 02 are arranged into seven subseries based on subject: Master Plan, Natural Resources, Cultural Resources, Roads and Trails, Buildings and Facilities, Utilities, and Boundaries and Land Status. Series 03 is arranged into seven subseries based on subject: Development Plans, Natural Resources, Cultural Resources, Roads and Trails, Buildings and Facilities, Utilities, and Boundaries and Land Status. File unit numbers denote the location of materials and are assigned DRAWER.FOLDER.

PROVENANCE The materials in this collection were created by Hawaii National Park (pre-1961) and Haleakalā National Park (1961 to the present).
