II. Museum Entrance Concept Design Discussion

The Design Review Team (DRT) discussed the concept designs and issues that had been brought forth by the park interdisciplinary team. Issues included 1. the appropriateness of the circular design; 2. the proposed walkway around and over the entrance; 3. the water features proposed in the courtyard area; 4. the views to the courthouse, which the DRT felt were substantially the same as the last design and therefore did not comment on.

Representatives from Missouri Preservation did not attend the meeting. The DRT comments were forwarded to and approved by Bill Hart later that day.

The formal DRT comments are below.

NO.	Design Review Team Comments on Museum Entrance Concept Designs
1	The circular walkway around and over the museum entrance is visually intrusive on the landscape. If a walkway is designed, it needs to blend better with the turf, and at the same time prevent turf from being trampled.
2	There is no objection to going forth with the circular entrance and seating area. There is no preference for seating area A or B. Both are equally acceptable from a cultural resource perspective.
3	Vertical water features are to be avoided in the gathering area.
4	End of Comments

III. Next DRT Meeting

The next DRT meeting will be held on Friday March 8 at 10 AM Central. The DRT will discuss concept plans for the east side connections between the NPS project and the Great River Greenways project along Leonor K. Sullivan Blvd.
