Date

In accordance with regulations and the delegated authority provided in Title 36, Code of Federal Regulations ("36 CFR"), Chapter 1, Parts 1-7, authorized by Title 16 United States Code, Section 3, the following provisions apply to all persons entering, using, visiting or otherwise within: (1) The boundaries of federally owned lands and waters administered by Joshua Tree National Park; (2) The boundaries of lands and waters administered by Joshua Tree National Park for public-use purposes pursuant to the terms of a written instrument. Unless otherwise stated, these regulatory provisions apply in addition to the requirements contained in 36 CFR, Chapter 1, Parts 1-7.

Written determinations, which explain the reasoning behind the Superintendent's use of discretionary authority, as required by Section 1.5(c), appear in this document identified by italicized print.

Justification: This is necessary to protect sensitive cultural resources from damage.

- Unattended parking is not allowed within the park between the hours of 10 p.m. and 6 a.m. except in designated campsites and at backcountry board parking areas.

Justification: This is necessary to prevent unauthorized camping in areas not designated for camping, group gatherings in undeveloped areas, sanitation problems, vandalism and theft of natural resources.

- No fixed anchors may be placed within the Fixed Anchor Free Zone. See Appendix 2: "Fixed Anchor Free Zone Map."

Justification: This is necessary to protect specific natural rock features from the introduction of Fixed Anchors. A fixed anchor is defined as any piece of climbing protection that is left in place to facilitate a safe ascent or rappel.

- The possession or transportation by any means of wild animals as listed or defined in Title 50 Code of Federal Regulations, Part 17.11 (Endangered and Threatened Wildlife) or California Fish and Game Code sections 2116 and 2118 (Wild Animals), or live farm animals (cattle, bison, sheep, goats, pigs chickens, etc.) is prohibited.

- Pinto Wye (Belle Mountain) and Cottonwood (Smoke Tree) Well Service Roads are closed to public vehicle traffic.

Justification: This is necessary to protect government property and personal property of government employees from vandalism and theft.

- Mine adits and shafts are closed to entry by the public.

Justification: This is necessary for public safety and to reduce the likelihood of people carrying the causal fungal agent of white-nosed syndrome, Geomyces destructans, to our bat populations. Studies have shown people can unintentionally carry this fungus from an infected site to a non-infected site on their gear, clothing and other personal effects in addition to protect the safety of park visitors from hazards associated with these cultural features.

(a)(2) The following areas have been designated for a specific use or activity, under the conditions and/or restrictions as noted:

Camping:

- Please refer to Section 2.10 for detailed camping area designations.

Segway Use

- Segways and motorized scooters, as defined under Section 1.4 are motor vehicles. The park imposes an interim restriction on the use of Segways and motorized scooters from all areas within the park including park roads, trails, and sidewalks. However, any park visitor with a disability is permitted to use Segways and motorized scooters throughout the park, including all structures, facilities, park roads, sidewalks, trails, and other surfaces when such devices are used for the sole purpose of mobility assistance. Finally, use of a mobility assistive device, as outlined above, must also adhere to the following:
  - A person shall operate any mobility assistive device in a safe and responsible manner; maximum speed will not exceed more than 8 M.P.H. ("Segway sidewalk/Intermediate" key), so as not to endanger one's self or any other park visitor.
  - A person riding any mobility assistive device upon and along a sidewalk, while crossing a roadway in a crosswalk or on any other surface shall have all the rights and duties applicable to a pedestrian under the same circumstances, except that the mobility assistive device operator must always yield to pedestrians (park visitors).

Justification: This provides for the use of mobility assistive devices within the park for individuals with disabilities and protection of the park resources against recreational activities inconsistent with park management.

Balloons

- The use of inflated balloons for any purpose is prohibited in the park (with the exception of administrative offices) unless authorized pursuant to a permit from the Park Superintendent.

Justification: This is necessary to provide protection to the park's native species from the potential ingestion or entanglement of balloons which can be lethal. It also is a sanitation issue with balloons littering the desert environment.

The following restrictions and/or conditions are in effect for the specific uses or activities noted:

Passenger Carrying Busses:

- Engines must be shut down when not underway.

Justification: The idling of bus engines adds unnecessary exhaust fumes to the air and diminishes the enjoyment by visitors of the peace and tranquility of the park.

Climbing

- Climbing is permitted in Joshua Tree National Park. Climbing with fixed anchors is permitted in the areas where fixed anchors may be installed and under the conditions listed in this compendium.
- No one may initiate or terminate a climb in an occupied campsite unless given permission by the occupant of that site.
- Glue, epoxy, cement, or any other adhesive may not be used to attach or reinforce hand and/or footholds for climbing or scrambling.
