## FINDING FJORDS WORKSHEET

Examine the maps in the classroom and answer the following questions.

### Map Questions:

- 1) In what parts of the world are fjords located?
- 2) Is there any part of the world where fjords are not found?
- 3) Look at the physical features found on the maps. What water or land features are always part of the fjords?
- 4) By looking at the maps, can you come up with a more exact definition of a fjord?

### Photograph Questions:

- 1) Describe what you see in the picture and how this may have affected the surrounding landscape.
- 2) Is this a fjord? Why or why not?
- 3) What is odd about the water in this picture? How do you think this happened?
- 4) Describe what is happening in this picture. How might this affect the land? The water?
- 5) What is this a picture of? Can you describe how this area was formed?
- 6) Describe how fjords (picture #6A) and bays (picture #6B) are different. Are there any ways in which they are similar?
- 7) What would you call this? (Hint: look at the vocabulary words)  
How was it formed? When was it formed? What letter is it shaped like?
- 8) Describe the difference in shape and surroundings from Picture #7.
