

# Seeds<sup>of the</sup> Southwest

Join a National Park Service Ranger to learn about the beauty of native seeds of the Mojave Desert and the variety of plants this environment produces throughout the year. Not only were these seeds instrumental in Native American diets but today are invaluable in Lake Mead's restoration efforts.

Join us for a seed ball making party and truly make a difference in our desert landscaping efforts. For more information and to make a reservation for a fun afternoon call 702-293-8990.

***Sunday, September 13, 1 p.m.***  
***Alan Bible Visitor Center Auditorium***
