

With more than 400 miles of cave passageways, Mammoth Cave ranks as the longest known cave system in the world. Mammoth Cave National Park was established in 1941. In 1981, the park was designated a World Heritage Site, and became the core area of an International Biosphere Reserve in 1990. The park merits this extra protection and special status for its spectacular features on the surface and in the cave, and the way these features illustrate the connection between humans and their environment.

Getting Here

Mammoth Cave National Park is located near Interstate 65 in south-central Kentucky, about 90 miles from both Louisville, KY and Nashville, TN. From the north, take exit 53 (Cave City); from the south, take Exit 48 (Park City). Signs will direct you to the park Visitor Center. Our address is 1 Mammoth Cave Parkway, Mammoth Cave, KY 42259

We're in the Central Time Zone!

For full park information, go online to www.nps.gov/macac or call 270.758.2180.

In 1916 the National Park Service, "America's Best Idea", began with the passage of the **Organic Act**, which guides us to "conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations". In this, the centennial year of the Service, we encourage you to Find Your Park here or at any of the more than 400 special places set aside by the American people so that all can appreciate our common heritage. ▶ www.nps.gov

FIND YOUR PARK

▶The following items are not permitted on Cave Tours or in the Visitor Center: Firearms, any type of weapon (clubs, batons, brass knuckles, etc.), pepper spray/mace, or knives. Secure these items in your vehicle, or in one of the lockers provided at the bus loading area.

White-Nose Syndrome (WNS) in Bats

▶Bats are sick and dying here at Mammoth Cave and across the United States and Canada. The effect on bat populations is a 'wildlife disaster' unprecedented in our time. In the ecological process, some species may become extinct. ▶The dying bats have been infected with a disease called white-nose syndrome, which causes them to wake up when they should be hibernating. It leaves them weak, decreases their flying ability, and exhausts the energy they stored for their long winter's sleep long before any food is available in the spring. They die of exhaustion, starvation and exposure. ▶Though WNS is deadly to bats, it is not harmful to humans. Bats can, however, carry other diseases harmful to people, like rabies. While in the park, you may see bats flying at odd times or you may see them on the ground, alive or dead. Although the risk of contracting rabies from a bat is very small, if a bat flies into you, or if you pick up a bat, you may need to be vaccinated. ^What can you do to protect yourself?▶Never touch a bat. If a bat comes into contact with you, or if you see a bat in an unusual place, please notify a park ranger. ▶To decrease the likelihood of direct bat contact, wear clothing that covers your skin, such as long sleeves, long pants and a hat. ▶Please be aware that cave tours and other activities may be modified or delayed in response to bat activity.

Take a little time to ensure that the activity you have chosen is the best one for you. Cave tours and nature walks can be strenuous, so be sure you understand what will be required before the start of your activity. If you are unsure, ask a park ranger to explain what will be required of you. NEVER let someone talk you into doing an activity if you feel uneasy about it. Youth under the age of 16 must be accompanied by an adult 18 years or older on all tours. ▶Cave and surface trails are uneven and slippery so be sure you have the proper footwear. Always look before you step. ▶All cave tours require shirts and shoes for admittance. ▶Backpacks extending above shoulder height, camera tripods or monopods, child strollers and infant backpack carriers are not allowed in the cave for visitor safety and resource protection. ▶Walking sticks and canes are permitted on cave tours only when needed for personal stability or support. ▶Flash photography is not allowed on cave tours. ▶To protect air quality, smoking is not permitted in the cave or at cave entrances. ▶Year-round cave temperature in interior passageways fluctuates from the mid-50s to the low 60s (in degrees Fahrenheit). However, winter temperatures can be below freezing at entrances. Generally, you will be comfortable wearing long pants and bringing a sweater or jacket.
