

## A-mazing Migration

For some time, it was thought that the Ancestral Puebloan people simply vanished from Mesa Verde. We now know that they migrated southward over 700 years ago. Their descendants include the Rio Grande Pueblos in New Mexico, the Hopi in Arizona, and the Ysleta del Sur in Texas.

Follow the paths through the maze from Mesa Verde to find the present-day locations of the Ancestral Puebloans' descendants. You must travel through and find at least one Ancestral Puebloan item along the way to each pueblo, and avoid any modern items.
