

Paradise Spring Recreation

Welcome to Paradise!

With its tremendous amount of snowfall, Paradise is a winter wonderland often into early summer. Recreating in end of season snow offers challenges and hazards unique to this time of year. Here is some information to help you get the most out of your visit. A map of the Paradise area is on the reverse side.

Mobile-Friendly Paradise Visitor Guide

For online Paradise information and downloads including the Paradise area trail snow-cover map scan the QR code or go to <https://go.nps.gov/ParadiseVisitorGuide>

Safety First!

End of season snow conditions create hazards specific to this time of year. The following information will help you prepare for current conditions:

- Hypothermia and frostbite are cold weather hazards which can lead to serious injury or death. If you are spending time outside, dress sensibly, drink lots of fluids, and take warm-up breaks indoors.
- You will need a reliable map and compass skills in many areas of the park because snow-covered trails can be difficult to follow.
- Avoid crossing steep, snow-covered slopes where a fall could be disastrous. Turn around instead. Comet Falls and Pinnacle Peak trails often have hazardous slopes. Take an ice axe if you know how to use it.
- Falling through thin snow bridges is a hazard anywhere streams remain snow-covered. Stay

alert for the muffled sound of running water.

- Falling into snow moats around trees, and adjacent to logs and rocks, can cause injury. Avoid getting too close.
- Avoid stepping on wet, slippery rocks, especially near rivers and waterfalls.
- Avoid stepping onto snow cornices. They may collapse under your weight.
- Beware of avalanches!
- Before starting your hike, check the posted snow-cover map for current trail conditions. The map and other Paradise information is available at the QR code and url on this sign.
- Winter storms can hit here any month of the year. Spring and early summer are notorious for unpredictable and rapidly changing weather. Obtain a current weather forecast and be prepared for winter-like weather even in June.

Protect Your Park

During spring and early summer fragile vegetation in Paradise meadows is at its most vulnerable stage. What little bare ground exists is wet, and plants are just beginning to come out of their winter dormancy. Walking on this bare ground at this time of year is especially destructive to these fragile plants. To protect these meadows, it is essential that you hike only on constructed trails or on snow that is deep enough to protect the plants underneath.

Keep your pets on a leash. In order to protect wildlife and visitors, pets are not permitted outside of the parking lot. Do not take your pet on the trails, snow or meadows.

Enjoy wildlife at a distance and keep human food properly stored. Do not feed wildlife, including birds. Pack out all litter.

Sledding and Sliding

The sledding and sliding area is closed for the season. Sledding is not allowed anywhere

in the park until sliding runs are constructed next winter.

Dangerous Terrain

Avalanches occur with frightening regularity. Check the maps for avalanche zones and ask a ranger for the forecast before you start. Backcountry travel is not recommended when

avalanche conditions are high to extreme. Carry the ten essentials and know how to use them. Notify a responsible person of your plans so they can contact rangers if you fail to return.

Ten Essentials

- map of the area
- compass
- extra food & water
- first aid kit
- headlamp or flashlight, extra bulb & batteries
- sunglasses & sunscreen

- pocketknife
- extra clothing & rain gear
- emergency shelter
- matches in a waterproof container—for emergency use only; fires are not allowed in Mount Rainier’s wilderness

Skiing and Snowboarding

A minimum of 3’ of snow is advised for skiing and snowboarding. Avoid damaging exposed vegetation. Do not cross snow-free areas.

Learn more by contacting a ranger at the information station located outside the visitor center when staffed, or at nps.gov/mora.

Hiking & Climbing Update

A wilderness permit is required for all overnight camping in the wilderness of Mount Rainier National Park. Wilderness permits can be obtained in Longmire at the Longmire Museum or Wilderness Information Center.

Are you considering a trip to Camp Muir? Make sure to download the Camp Muir route brochure at the QR code above.

Snow-covered, unmarked routes require hazard assessment and route-finding skills to recreate safely.

Snow-free hiking in spring is usually available in the Longmire area.

SKI ROUTES

Primary Avalanche Danger Areas
Not limited to these slopes.
Check Forecast!

Plowed Roads

Unplowed Roads (Easy - Intermediate)

Routes

Route Finding Skills Required!

Contour Interval 100 Feet 4/24 pw

Emergency? See a ranger or dial 911.
Overnight parking in designated areas only.
Camping prohibited in parking areas.
No pets outside parking areas.
Permit required for camping.

Stevens Canyon Road is closed until mid-late May. Check at a visitor center or nps.gov/mora for status.
