BIRDS
of
OZARK RIVERWAYS

Ozark Riverways was established to protect the natural and cultural resources of the Current and Jacks Fork Rivers. The great diversity of birds found within the park is a result of the many kinds of habitat available.

This list (revised August, 1991) includes 196 species. However, many other birds occur within the Ozarks that have yet to be recorded within the park. We invite you to share with us any observations or comments (or field notes!) that you may have. Sightings of rare or occasional species, or a species that is not listed, should be reported.
Write or call:

Ozark Riverways
P.O. Box 490
Van Buren, MO 63965
(573) 323-4236

A - Abundant:	widespread and easily found in proper habitat in large numbers.
C - Common:	widespread and easily found in proper habitat.
U - Uncommon:	widespread in small numbers or common only in restricted habitat.
O - Occasional:	found in small numbers locally or in restricted habitat.
R - Rare:	reported at least once in last five years.

Sp - Spring: March-April
Su - Summer: May-August
Fa - Fall: September-October
Wi - Winter: November-February

* - Possible nesting species within Riverways
** - Confirmed nesting species within Riverways.
