

# Vision Fire 10 Year Anniversary Fact Sheet #1 – Community Assistance with Wildland Fire Protection in West Marin

Having experienced the Vision Fire, Point Reyes National Seashore and West Marin communities were very proactive in responding to the initiatives of the National Fire Plan, which began in 2001. In partnership with local fire departments and FIRESafe MARIN, many projects have been funded and implemented which have improved community fire protection.

Two main components of the National Fire Plan have helped improve fire protection in West Marin since the 1995 Vision Fire:

## **1) Wildland-Urban Interface Community Assistance Program (WUI) –**

Funding has been provided for community-based projects to reduce hazardous fuel near developed areas by clearing and thinning vegetation, and provide educational outreach, encouraging homeowners to reduce fuel around structures on their property.

## **2) Rural Fire Assistance Program (RFA) –**

Funding has also been allocated through the Rural Fire Assistance Program to volunteer fire departments and rural fire districts for training, equipment, and fire prevention activities.

Communities throughout Marin County have benefited from these programs.

---

Nearly \$1.3 million in Wildland-Urban Interface funding provided by the National Fire Plan, from 2001-2004 has been used for community fire protection projects in West Marin:

---

### West Marin

[Olema Chipping Program](#) - \$20,000 (2001), \$20,000 (2003), \$12,000 (2004)

[Water Pump System Upgrade](#) - \$61,000 (2002)

### Inverness

[Keith Way Fuel Break](#) - \$15,000 (2002)

[Inverness Chipper Days](#) - \$12,000 (2002)

[Inverness Public Utility District Chipper](#) - \$20,000 (2001)

[Inverness Roadside Fuel Treatments](#) - \$50,000 (2003)
