### Safety Tips

- Check river conditions before launching [www.nps.gov/sacn/planyourvisit/current-conditions](http://www.nps.gov/sacn/planyourvisit/current-conditions).
- Know your paddling ability. Not all stretches of the Riverway are suitable for beginners.
- Avoid trees that have fallen into the river. They can catch and overturn your vessel.
- Wear sunscreen, sunglasses, and a hat to prevent sunburn.
- Use alcohol responsibly.
- Do not bring glass containers to the Riverway. Broken glass cuts bare feet.
- Protect your feet with river shoes or sandals
- Bring your own drinking water. The water is not safe to drink unless purified.
- Check for ticks.
- Watch for poison ivy.

## Namekagon River Map 1: Namekagon Dam to Hayward Landing

*Native brook trout are found in the colder waters of the upper Namekagon River.*

### In This Stretch

- The first ten miles of this stretch are isolated. Expect numerous beaver dams, downed trees, and three low bridges. Water levels can be extremely low and impassable during dry conditions.
- From **Phillipi Landing** to **Cable Wayside**, water levels tend to be slightly better.
- At the old **Phipps Dam** site, you can usually run the rapids or look for the portage on the right.
- From **Trout Run Landing** to Hospital Road you may encounter large groups of people on tubes.
- Hayward Lake is large and open, making paddling difficult during a strong headwind. You must portage the **Hayward Dam**.
