### Safety Tips

- Check river conditions before launching [www.nps.gov/sacn/planyourvisit/current-conditions](http://www.nps.gov/sacn/planyourvisit/current-conditions).
- Know your paddling ability. Not all stretches of the Riverway are suitable for beginners.
- Avoid trees that have fallen into the river. They can catch and overturn your vessel.
- Wear sunscreen, sunglasses, and a hat to prevent sunburn.
- Use alcohol responsibly.
- Do not bring glass containers to the Riverway. Broken glass cuts bare feet.
- Protect your feet with river shoes or sandals
- Bring your own drinking water. The water is not safe to drink unless purified.
- Check for ticks.
- Watch for poison ivy.

## Namekagon River Map 2: Hayward Landing to Trego

scarlet tanager

*The St. Croix and Namekagon rivers are migration corridors and nesting areas for many species of songbirds.*

### In This Stretch

- After **Hayward Landing** the river is rocky and narrow. A few miles downstream the river becomes sandy and slow. Water levels are usually good.
- Just downstream from **Stinnett Landing** the river narrows, forming a chute.
- As you continue downstream the river quickens with many Class I rapids.
- After **Big Bend Landing** the river widens, slows, and is an easy paddle.
- **Earl Park Landing** is a popular put-in spot for people on tubes on hot summer days.
- Shortly after **Lakeside Road Landing** the river passes under Highway 53, and then there are five miles of slow paddling through the **Trego Flowage** to the **Trego Dam**. (See Map 3 for the complete map of the Trego Flowage.)
- **ALERT:** Construction of US 53/63 Trego Interchange will occur 2021 through 2022. See map side for further information.
