

Saguaro National Park - Saguaro Census Plot #38  
 December 18 & 19 2009 and January 15, 2010 – Park Staff and Volunteers

Saguaro Plot #38

In this figure, green bars are the number of saguaros counted in 1990, red bars are saguaros counted in 2000 and blue are saguaros counted in 2009 and 2010. Each column represents a size range; with small ones (less than 1 meter tall) on the far left side and large ones to the right, with the total number on the far right. There has been a large increase in the number of young saguaros less than 1 meter tall on this plot and an overall increase of over 1000 saguaros from 1990 to 2010.

After a long hike in we reach the plot.

The beautiful view from our plot.
