## Joe Wiegand as Theodore Roosevelt

As an actor and historian, Joe's portrayals of Theodore Roosevelt in live performances have people wondering if TR has come back to life.

Joe has been featured as President Roosevelt in "The Men Who Built America" on the History Channel, served as the model for the newest TR sculpture at the American Museum of Natural History in New York City, and has a feature role in "National Parks Adventure" a film about our national parks still showing in IMAX theaters throughout the country.

## Calliope Brass

Calliope Brass collaborates with the world's most prominent creatives to build evocative, story-driven concert experiences for a variety of audiences. Inspired by the eponymous storytelling muse in Greek mythology, Calliope Brass is most known for its innovative approach, successfully expanding upon the more traditional norm of recital-style performances.
