35. Historic Name: Pennsylvania Railroad, Boxcar #109760. C109760, 81568

Boxcar #109760. Class: XM. PRR Class: X26c. Series: 104260-107759. Built September 1919 as #86842 in the series 86798-86900. Part of a group of wood boxcars rebuilt into exterior steel cars in the Pennsylvania Railroad Shops, 1945-1950. Rebuilt by Morrison Railway Supply about 1964 and purchased from that company by the Vermont Railway, renumbered to VTR #526. Acquired by Nelson Blount. The original number of 86842 was located on the center sill but the number concurrent with the X26c rebuild is unknown. Hence, 109760 is a fictitious number created by Steamtown when the boxcar was repainted to its 1940 configuration. The created number is made from the last number in the series plus one. Painted and lettered to PRR usage in 1993 and repainted in 1999.
