and his duty as a soldier he was not at the battle of Chicamauga when his Co was annihilated. Now by this certificate you did him great injury and I hope you will take pains to correct it. The following are the facts and he wants them certified to the Pension Office to be filed in Case No. 58199

While with the Regiment at Cowan Station Tenn in Aug 1863 he took Diarrhea and was for a few days about a week disabled from duty thereby and on sick report to then got some better but did not recover fully but was on duty and fought desperately at the battle of Chicamauga Sept 20th 1863 and while the Regiment was fighting the 16th and 18th Regiments were retreating he stopped the color bearers of those Regiments seized the colors sounded his bugle for advance and rallied both Regiments But was captured at that battle taken to prision at Richmond and his Diarrhea there became worse and he was put into hospital there with you. And you will recollect it he thinks for you certainly saw him there and knew he was sick with Diarrhea. Please certify these facts The origin of this case Chronic Diarrhea in the service of the U.S. is the most material fact giving time and Place

Capt. E. M. Finney
Late of the 15th Regt. U.S. Infty

Sir Wm. J. Carson late Private of Co. 1st Battalion 15th Infty who served as Bugler applied for Pension in January 1865 by me as his Agent and he refered me to you for a certificate that he contracted his disease in the service of the United States and line of duty. I wrote to you for a certificate and asked you to write out one and send it to the Pension Office and you did so but made a great mistake and had your mind on the wrong man and in doing so caused great injury and wrong to a most worthy Soldier.

You certified his name as Wm. J. Carson whereas it is Wm. J. Carson, You certified him to be of the 2nd Battalion whereas he was of the 1st Battalion You certified that he contracted Syphilis at Fort Adams R.I. a short time before his Co. left that Post for the field. He never had Syphilis and never was at Fort Adams R.I. before his Co. left for the field nor was his Co. ever there at any time when he was with it Wm. Co. E. 2nd Battalion did join the 1st Battalion at Cowan Station Tenn. from Fort Adams. But this Wm. J. Carson is the same Wm. J. Carson who served as Bugler and was captured with you at the battle of Chickamauga on the 20th of Sept. 1863 and has several Certificates of most extraordinary gallant conduct in that battle and one from yourself and now in this one Certificate that you send to the Pension Office you say that he has no disabilities and unfaithfulness to his Country

To the Commissioner of Pensions.

This is to certify that I have been acquainted with Wm J. Carson of this place since the Summer of 1887, since which time I have been his family Physician. I know him to be a man strictly temperate in all his habits; he uses no liquor nor tobacco in any form; and he is very careful of his health in every way, avoiding exposure of any kind. He is also careful that his bowels are evacuated each day, and that his bladder is properly evacuated.

Ever since my first acquaintance with Mr. Carson, he has been afflicted with a Chronic Rectal trouble from which he says he has suffered ever since he contracted the Camp-diarrhoea in Rebel-Prison, when in the U.S. service in the late civil War, of 1861—1865.

By examination with the Speculum, the mucous membrane of the Rectum is found to be dark-red, very much thickened, with here and there, patches of inflamed and ulcerated folcles or papillae, extending

extending higher up the rectum than is usual for chronic diseased conditions of the rectum to extend.

These ulcerated patches throw out an abundance of Mucous. At times he has accute attacks of inflamation of the Rectum. and the mucous becomes purulent.

Recently, especially during the last year, when he has these accute attacks with the rectum. he suffers intensely in the Hypogastric, Left Inguinal, and Left Lumbar regions. also in the Right Inguinal region. and the part of the left thigh that is supplied with Illo-Inguinal nerve: when the accute attack of the rectum is relieved. these parts in which he has suffered intensely are also relieved. but are left in a tender, sore, numb condition. At each successive attack, more and more of the left leg in limb has become involved; this is so much the case that in his last attack, which was in last July and August. the suffering in his entire left limb was most intense: the suffering was also intense in all those parts before mentioned. extending to the back and left hip; indeed to all those parts which are supplied with nerves of the Lumbar. and the Sacral Plexus: also

When the inflamation of the Rectum was greatest the pain extended up the spine and into the back of the head, and into the eyes producing considerable photophobia. The pain would become intense also in his stomach. (Epigastric region)

He could get no relief from his suffering in all these parts except temporarily by the use of narcotics, till the Rectum was relieved of the accute inflamation.

During this attack, he was quite helpless: and even when his condition was much improved, he had not a good use of the parts in which the pain was most severe. There were two months in which he was obliged to have the constant care of a nurse: And now since he is up and attends to business, he can walk only with a cane, and that with diffienlty, as the entire left leg, or limb, is weak: All the Muscles supplied by the Anterior tibial nerve, are affected; and the Tibialis anticus and Peroneus tertius muscles are entirely paralyzed, so that he can not flex the foot upon the leg at all in either direction.

Sensation is also completely destroyed in the outer part of the lower third of the left leg; a needle can be run deep in

without producing any pain at all.

I should have mentioned that the bladder also becomes affected when the Rectum becomes inflamed.

That all this suffering and helplessness; indeed that all these conditions are dependent upon, and are caused by the diseased condition of the Rectum, is verified by the fact that whenever the rectum is in any way affected these other parts supplied by the Lumbar, and the Sacral Plexus of nerves, are also affected; and when the Rectum is relieved they are relieved. Indeed, when the rectum at any time becomes loaded with faeces, it is felt more or less in all these other parts; and when the rectum is evacuated, they are relieved.

It might be proper to mention that the rectum is so inactive, that he never has an evacuation of the bowels without the use of the syringe, warm water injections.

It is certainly plain to be seen that he is not able to perform manual labor of any kind.
