

# land and values of the second second

State Assistance Program 2006 Annual Report

### **National Program Goals**

Reflecting the goals of the LWCF Act, the goals of the Land and Water Conservation Fund State Assistance Program are:

1. Meet state and locally identified public outdoor recreation resources needs to strengthen the health and vitality of the American People.

2. Increase the number of protected state and local outdoor recreation resources and ensure their availability for public use in perpetuity.

3. Encourage sound planning and long-term partnerships to expand the quantity and ensure the quality of needed state and local outdoor recreation resources.

# building new parks

STERS

I am pleased to share this summary of the Land and Water Conservation Fund's State Assistance Program for Fiscal Year 2006. Our program results in 2006 continue to reflect a high level of achievement in providing millions of Americans with the opportunity to lead physically active and healthy lives. In partnership with states and communities, we continue to support, enhance and create public parks for the benefit and use of all. And we continue because we know there is still more work to be done: across the country the current demand for new outdoor recreation facilities and parkland acquisition at the state and local level remains as strong as ever. In 2006,

four-fifths of the states reported an unmet funding need exceeding 80%.

I am proud of the hard work by the National Park Service Land and Water Conservation Fund team. They do a magnificent job, and take seriously their role in protecting in perpetuity the integrity and recreational value of all state and local parks, lakes, trails, beaches, and conservation lands assisted by the Fund. They join 20,000 of their colleagues to carry out the National Park Service mission to "cooperate with partners to extend the benefits of natural and cultural resource conservation and outdoor recreation throughout the country and the world."

Mary H. Jomar Mary A. Romar

Mary A. Bomar Director, National Park Service

Carlin, Nevada: Equestrian Park

### **New Park Highlights**

In 2006, nearly 400 communities received funding to develop new or rehabilitate existing outdoor recreation and support facilities. Almost 65% of these LWCF-assisted sites (261) benefitted from entirely new recreation facilities, site improvements or enhancements.

### Allen, Texas: The Edge at Allen Station Park

The Edge, as the new active recreation facility is known, features a concrete skate park, two roller-hockey rinks, BMX track and youth center. The skate park is now the largest outdoor facility of its kind in the state.

Allen, Texas: The Edge at Allen Station Park

### Carlin, Nevada: Equestrian Park

Equestrian sports are popular throughout Nevada. Construction of a new equestrian park adjacent to the Nevada Gold Mining Interpretive Center provides recreation for 4H groups, and various outdoor equestrian events. This park has been supported by a grassroots community effort, with much of the LWCF match coming from local businesses, raffles and in-kind services.

Treynor, Iowa: East Park

"Having taken my grandson to the new playground many times, I cannot express my gratitude for the DNR's involvement in getting us a LWCF grant. I have witnessed a ten-fold increase in the usage of the new equipment by our kids."

- Mayor Charles Killion, Treynor, Iowa

Platt County, Missouri: Green Hills Wildlife Preserve

### Platte County, Missouri: Green Hills Wildlife Preserve

Planting day at Green Hills Wildlife Preserve, a newly-protected green space near Kansas City which includes over 45 acres of protected forest, prairie, fresh water springs and scenic river bluffs. Platte County is in the process of developing trails, picnic shelters and play areas.

# Land and Water Conservation Fund 2006 Achievements

1. Grant Dollars Awarded	\$65,828,153*
2. Matching Dollars Leveraged	\$92,545,085
3. Recreation Areas Funded	424
4. New Acres Permanently Prote	ected 34,635
5. Previously Protected Acres wi New Recreation Improvemen	
6. States Receiving Assistance for Statewide Outdoor Recreation	

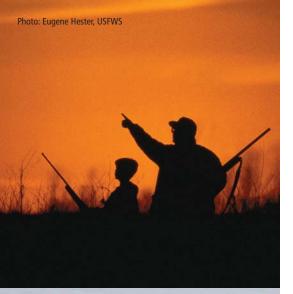

\*Includes some prior year funds.

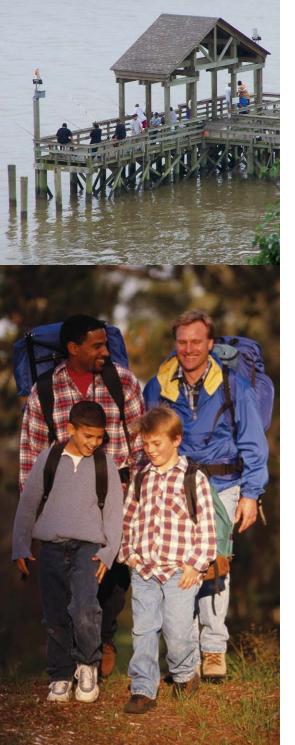

Hemingford, Nebraska: Community Pool

"Your assistance made our dream of a new pool come true. For small communities, these dreams are accomplished only with strong community support and great programs such as the Land and Water Conservation Fund."

 Margaret A. Sheldon, Village Administrator Hemingford, Nebraska

Williamsburg, Virginia: York River State Park

### **Program Accomplishments in 2006**

**Direct Community Impact:** In 2006, all fifty states, the District of Columbia, and the territories of Guam, Northern Mariana Islands, Puerto Rico and Virgin Islands obligated \$65.8 million dollars in LWCF federal grant monies to acquire recreation land and to develop and upgrade outdoor recreation facilities. This much-needed assistance made a direct impact on park and recreation facilities in 399 local communities.

**Increase in New Park Lands:** Grants approved in 2006 will result in an increase in the public recreation estate by a total of 19,427 new acres. In many communities, these acres mean brand new parks and recreation facilities. Examples are included in the Project Sites list on page 13 and throughout this report.

**Building and Upgrading Parks:** For most communities, meeting citizen needs for recreation and physical activity is a three-fold challenge: acquiring land for recreation, developing new recreation facilities and enhancing existing facilities. In 2006, 373 park and recreation areas were enhanced with grants to develop new or rehabilitate existing outdoor recreation and support facilities. More than 70% of these LWCF-assisted sites (261) benefitted from entirely new recreation facilities, site improvements or enhancements.

**Protecting Parks Forever:** Finally, beyond direct assistance to develop and enhance facilities, every assisted site is protected against conversion to non-recreation use without a thorough review and acceptable replacement for the impacted parkland. This ensures the federal and state/local investments remain available, not just for today's citizens but for all future generations of Americans. In 2006, LWCF steward-ship protection was expanded by 34,635 acres, including 207 new and existing park sites that received LWCF protection for the first time.

**Meeting State Targets:** In early 2006, NPS collected data from each state reflecting their targets for three performance measures: 1) Number of parks where new outdoor recreation facilities were developed; 2) Number of parks enhanced through development or rehabilitation; and, 3) Number of new acres protected. The actual 2006 accomplishments, respectively, were as follows: 19 states met or exceeded their facilities target; 37 states met or exceeded park enhancements; and 32 States met or exceeded new acres protected. Nationwide, the cumulative totals exceeded the overall targets, including more than doubling the target for new acres protected.

# land and water conservation fund: accomplishments in 2006

National Program Goal	Performance Goal	Performance Measure	Success
1. Meet state and locally identified public outdoor recreation resources needs to strengthen	<ol> <li>Increase quantity of outdoor recreation resources for public use and enjoyment.</li> </ol>	<ul> <li>Number of new parks created for public outdoor recreation use and enjoyment.</li> </ul>	62 parks
the health and vitality of the American People.		<ul> <li>Number of new acres of land and water made available for public out- door recreation use and enjoyment.</li> </ul>	19,427 acres
		• Number of parks where new outdoor recreation facilities were developed.	261 parks
	2. Enhance the quality of outdoor recreation resources for public use and enjoyment.	<ul> <li>Number of parks enhanced through new development or rehabilitation of outdoor recreation and support facilities.</li> </ul>	373 parks
	3. Ensure close-to-home public outdoor recreation resources.	<ul> <li>Number of local jurisdictions where LWCF grant projects are located.</li> </ul>	399 jurisdictions assisted in 2006
2. Increase the number of protected state and local outdoor recreation resources and ensure their avail- ability for public use in perpetuity.	<ol> <li>Increase the number of acres of protected outdoor recreation resources for public use and enjoyment.</li> </ol>	• Number of new acres protected.	34,635 acres
		• Number of new sites protected under the LWCF Program.	207 sites
	5. Ensure that outdoor recreation resources funded through the LWCF Program are retained and used for public outdoor recreation in perpetuity.	<ul> <li>Number of LWCF projects inspected and determined to be open for public outdoor recreation use.</li> </ul>	3,323 projects
		• Percent of inspected acres funded by the LWCF determined to be open for public outdoor recreation use.	100% of inspected acres*
3. Encourage sound planning and long-term partnerships to expand the quantity and ensure the quality of needed state and local outdoor recreation resources.	<ol> <li>Stimulate planning initiatives to help states identify outdoor recreation needs and establish the implementa- tion strategies to meet those needs.</li> </ol>	• Total number approved SCORP plans.	54 plans
		• Number of SCORP plans that were updated in 2005.	1 plan
	7. Leverage local and state matching investments that support outdoor recreation projects.	• Number of projects that exceed the 50% non-federal match.	45 projects

Charting the National Need for Parks and Recreation in 2006

In an effort to measure the current need for outdoor recreation facilities and parkland acquisition at the state and local level, the National Park Service asked each state in October 2006 to estimate their total unmet need for Land and Water Conservation Funds for the past fiscal year. If a state typically combines Land and Water Conservation Funds with similar state grant programs, an estimate of the total unmet need for all programs was used. With all fifty states responding, this chart demonstrates a consistent picture of strong demand for recreation facility development and parkland acquisition funding: 82% of the states reported an unmet funding need exceeding 80%. Since Land and Water Conservation Funds are available to states for three years following appropriation, it is important to note that some states have not fully awarded their apportioned funding.

> \*Unmet needs shown are as reported by each applicable State.  $\label{eq:NR} \mathsf{NR} = \mathsf{Not} \mbox{ reporting}.$

### A Closer Look at National Need

In addition to an overall estimate of unmet need, the National Park Service asked each state to characterize their pool of unfunded projects. Here are profiles from ten states across the country.

In Arizona, the unmet need was estimated at \$6.9 million, unfunded projects include requests from the Quechan Indian Tribe to develop a nature park and restore riparian wetland habitats along the Colorado River in Yuma; from Scottsdale to provide lighting for new and existing ballfields; and from Eloy, a small community with few recreational facilities, to develop a neighborhood park on donated land.

In California, the unmet need was estimated at \$2.3 million, but this total has been skewed by several factors affecting the accuracy of such estimates. Significant factors affecting unmet need data include the decreased appropriation California received this year, which discouraged many potential applicants; and the \$150,000 limit for local agency projects, which resulted in more scaled down "band-aid" approach to projects, also because of the decreased LWCF funding. In past years when funding was much higher, California's applications were greatly increased, which, in turn, greatly increased the number of excellent projects in the selection pool.

In Colorado, the unmet need was estimated at \$25 million, a diverse list of approximately ninety unfunded projects included the Shady Lane Pocket Park in Cortez, park and recreation land acquisition in Cripple Creek, the Riverwalk Trail in Gunnison County, Jackson Creek Trail in El Paso County and the Crystal Valley Trail in Pitkin County.

In Iowa, the unmet need was estimated at \$1.1 million, unfunded projects include community aquatic centers in Clear Lake, Eagle Grove, Manly, and Melbourne; a playground project in Scharnburg; trail acquisition and development in Des Moines County; skate parks in Carroll, Newton and Rock Rapids; campground and park revitalization work in Allison, Clinton, Creston, and Cherokee and Mitchell counties.

Santa Cruz County, Arizona: Patagonia Lake State Park facility upgrades include new modular restrooms and showers in the two campgrounds and adding electricity to over 100 campsites.

Cullman, Alabama: Whatley Park Soccer and Tennis Facilities

Ingham County, Michigan: Hawk Island County Park

Oregon City, Oregon: Wesley Lynn Park

"As Oregon City's first new park to be opened in more than 23 years, we are delighted that the Wesley Lynn Park project has been completed. The park provides green spaces for active and passive recreation, offering amenities identified as high needs in our community in an area historically lacking in parks and open space."

 Scott Archer, Community Services Director Oregon City, Oregon

Muskogee City, Oklahoma: Three Forks Harbor

In Kentucky, the unmet need was estimated at \$3.5 million, unfunded projects include little league baseball fields, soccer fields, picnic shelters, playground equipment, nature trails, a greenway project, campgrounds, and lighting for sports and playfields.

In North Dakota, the unmet need was estimated at \$1.5 million, unfunded projects include improvements to community parks in Langdon, Lidgerwood and St. John; community pool enhancements in Ashley, Roosevelt and Velva; and several state park projects. Similar to California, Nebraska also noted that the unmet need would have been significantly higher if all interested municipalities had applied.

In Oklahoma, the unmet need was estimated at \$3.3 million, unfunded projects include new community recreation facilities in Okeene, Moore, Poteau and Bethany; facility improvements at Roman Nose State Park and Oklahoma State University.

In Oregon, the unmet need was estimated at \$5.4 million, examples of unfunded projects include significant recreational trail projects in Aumsville and Gresham which would have improved safety and environmental impacts; and basic infrastructure improvements at a neighborhood park in Estacada.

In Vermont, the unmet need was estimated at \$4.4 million, examples of unfunded projects include major projects at five parks in Burlington, along with municipal recreation projects in Chelsea, Fairfax and Fairfield, Randolph and Shoreham.

In Wisconsin, the unmet need was estimated at \$32 million, unfunded local projects for recreational facility development, renovation and land acquisition represent 43% of the total, with state projects making up the balance, including land acquisitions for one wild lake, the Ice Age National Scenic Trail and the Kettle Moraine State Forest.

"Partnership with the Land and Water Conservation Fund was essential to the success of our recreational development. To date, the Three Forks Harbor Project has invested nearly \$10 million in public and private funds to construct a multi-use recreational facility that interfaces with the national inland waterway navigation system."

- Dave Davis, Special Projects Coordinator, Muskogee Port Authority, Muskogee, Oklahoma

Chincoteague Island, Virginia: Waterfront Park In 2006, Scenic Virginia selected Robert N. Reed Sr. Downtown Waterfront Park for a 2006 Honorable Mention award in the category of Best Creative Scenic Improvement.

### SCORP Update: Experts Agree – Getting Outdoors is Good for Your Health

A fundamental purpose of the LWCF State Assistance Program is to respond to state and local public outdoor recreation needs and thereby promote community health. Increasingly, States are using the Statewide Comprehensive Outdoor Recreation Planning (SCORP) process to provide policy, direction, and incentives for state and local park systems to increase public use of outdoor recreation areas to improve personal health.\*

**Nebraska:** According to the 2006 Nebraska SCORP, park and recreation areas within a community lower the estimated costs of future health care, since regular physical activity reduces the risk for heart attack, colon cancer, diabetes, high blood pressure, and may reduce the risk for stroke. Nebraska's SCORP integrates the findings of the State's Physical Activity and Nutrition State Plan, which states that physical activity need not be strenuous to be beneficial; people of all ages can benefit from moderate physical activity such as 30 minutes of brisk walking five or more times a week. The State Game and Parks Commission is partnering with the State Health and Human Services Agency to increase the public's outdoor recreation activities for personal health and wellness.

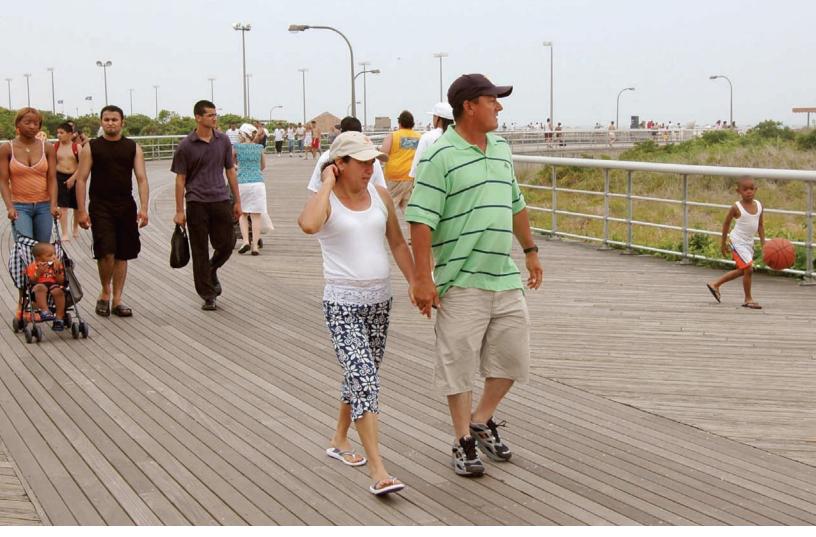

**Iowa:** SCORP planners are surveying residents about their use of parks and trails for physical fitness in order to develop performance goals and measures for encouraging lowans to get physically and mentally healthy through outdoor recreation. This effort will link to the Iowa Department of Public Health's Comprehensive Nutrition and Physical Activity Plan measures.

**Oregon:** Grant applicants receive extra points for outdoor recreation projects that will result in active recreation opportunities promoting physical well-being. Grant program managers cite the U.S. Center for Disease Control (CDC) finding that a sedentary lifestyle is a major contributor to an alarming increase in major health problems such as heart disease and diabetes within the American population.

**Pennsylvania:** Pennsylvania State University researchers are developing guidance for States to use the SCORP process to develop performance goals and measures tailored to each State's needs to achieve health outcomes associated with public outdoor recreation resources.

\*States are required to produce a Statewide Comprehensive Outdoor Recreation Plan (SCORP) every five years to maintain their eligibility to participate in the Land and Water Conservation Fund Program.

### **Supporting City Parks**

More than 40 of the "100 Largest City Parks" recently identified by the Trust for Public Land's (www.tpl.org) Center for City Park Excellence, received LWCF funding support.

"I am tremendously impressed to learn about the large number of major city parks and the amount of city park funding that has stemmed from the Land and Water Conservation Fund. It's also particularly comforting to know that these large LWCFassisted parks have additional permanent protection through the federal government."

### **Protecting Places that Matter**

Our booklet on site stewardship explains the purpose of Section 6(f) of the LWCF Act and the role local communities and state partners play in ensuring that park places are protected in perpetuity from non-recreation uses, unless that use has been approved by the NPS. The full text is available on the web at www.nps.gov/lwcf.

### Visit us at nps.gov/lwcf

The LWCF website provides current program information, including announcements on state apportionments, LWCF project highlights, program contacts, the LWCF grants manual, and all federal forms needed for a LWCF project. In 2006, NPS also provided a link to a comprehensive listing of all funded projects to date. The list includes summary reports by year and by state as well as a list by state and county.

Peter Harnik, Director, Center for City Park Excellence, Trust for Public Land

# land and water conservation fund 2006 project sites

The Land and Water Conservation Fund is a visionary program established by Congress to preserve, develop and assure accessibility to quality outdoor recreation resources for active participation in recreation and "to strengthen the health and vitality of the citizens of the United States (Public Law 88-578)." In a landmark study more than forty years ago, the Outdoor Recreation Resources Review Commission championed the vital connection between local recreation facilities and public health, the very same connection prevalent in today's prescriptions for creating healthy communities. Projects are listed by county with congressional districts in parentheses. Images featured in this section highlight both current and recently completed LWCF projects.
