Voyageurs National Park

Publication Plan 2009

PUBLICATION PLAN

Voyageurs National Park 2009

Prepared by:

The Interpretive Staff at Voyageurs National Park

This Publication Plan (PL) provides a vision for the future of publication materials at Voyageurs National Park. The intended life span of the PL is five to ten years. The plan defines why we provide the publication materials that we do, describes the current publication materials, and identifies what the park staff is working to achieve for publications in the future.

Part I: Introduction

Foundation for Planning

This Publication Plan (PP) defines why Voyageurs National Park provides publication materials, describes the current publication, and identifies what the park is working to achieve in the future. This plan is connected to the General Management Plan (2001), and the Long Range Interpretive Plan (2005).

Park Setting

Voyageurs National Park is a land and water environment of great beauty, exceptional natural and cultural resources, and abundant recreation opportunities. Located in the lake- country of northern Minnesota, the park protects 218,054 acres that include roughly 134,000 acres of woodlands, 84,000 acres of water, 655 miles of undeveloped shoreline, and hundreds of islands. The park's 55- mile northern boundary is the international border between the United States and Canada.

This forested lake country along Minnesota's northern border was once the scene of an epic chapter in North American history. The park's complex system of waterways includes an important segment of the "transcontinental highway" traversed by French- Canadian voyageurs during the late 1700s and early 1800s. For more than a century, voyageurs plied the maze of lakes and streams in birch bark canoes and transported vast quantities of furs and goods between Montreal and the Canadian Northwest. The economic impact of the fur trade during this era was immense, as was the effect on natural and social systems. Although the park is named for the voyageurs and their role in the North American fur trade, there are other human stories here - - from the native peoples who lived on this land beginning 10,000 years ago, to the gold miners and settlers of the past century.

The rocks tell the oldest story here. Lying in the southern portion of the Canadian Shield, the bedrock of Voyageurs National Park is between 2.1 and 2.8 billion years old, some of the oldest exposed rock in the world. Younger rock formations do not appear here. Perhaps they never existed; but more likely a series of glaciers removed them. Those glaciers - - ice sheets two miles thick - - also gouged out the lake and river beds here and set the stage for vast forests.

Voyageurs is unique among national parks as a place where the southern boreal forest meets and mixes with the northern hardwood forest. Wildlife thrives here. Voyageurs is one of only two national parks in the continental United States with an indigenous population of Eastern timber wolf. Bald eagles, black bears, moose, beaver, river otter, loons, and many other animal species also live here.

But it is water that dominates the Voyageurs National Park landscape. Within its boundaries more than 30 lakes fill glacier- carved rock basins. Once visitors arrive at one of the park's four entry points, most of them leave their cars behind and set out by water, much as the voyageurs did centuries ago. Today park visitors can still enjoy those same waterways and sense the spirit that beckoned Native Americans and French- Canadian voyageurs.

Legislative Background

Voyageurs National Park (VOYA) was authorized by an Act of Congress on January 8, 1971 (84 Stat. 1971) "to preserve, for the inspiration and enjoyment of present and future generations, the outstanding scenery, geological conditions and waterway system which constituted a part of the historic route of the Voyageurs who contributed significantly to the opening of the Northwestern United States." The park was established in 1975.

Park Mission

During the course of creating the General Management Plan/Final Environmental Impact Statement for Voyageurs National Park in 2002, a park mission statement was composed that states:

Voyageurs National Park preserves the landscapes and scenic waterways that shaped the route of the North American fur traders and defined the border between the United States and Canada. The park and its diverse resources provide outstanding opportunities for outdoor recreation, scientific study, sport fishing, education, and appreciation of the northwoods lake country setting.

Park Purpose

Park purpose is the reason or reasons for which a park area was established. The basic purposes of Voyageurs National Park were identified in the General Management Plan/Environmental Impact Statement of 2002. The purpose statements listed below reflect that planning team's analysis of the 1971 Act that created Voyageurs National Park, its legislative history, and comments received in public meetings:

- Preserve the scenery, geologic conditions, and interconnected waterways within the park for the inspiration and enjoyment of people now and in the future.
- Commemorate the voyageurs' routes and fur trade with the native peoples of the north, which contributed significantly to the opening of northwestern North America to European settlement.
- Preserve, in an unimpaired condition, the ecological processes, biological and cultural diversity, and history of the northwoods lake country border we share with Canada.
- Provide opportunities for people to experience, understand, and treasure the lake country landscape - - its clean air and water, forests, islands, wetlands, and wildlife - - in a manner that is compatible with the preservation of park values and resources.

General direction of the park's purpose comes from the National Park Service's Organic Act of 1916 which states that the purpose of the NPS is "...to conserve the scenery and the natural and historic objects and the wildlife therein, and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

Park Significance

The significance of a park is summarized in statements that capture the essence of the park's importance to our natural and cultural heritage. Knowing the park's significance helps to set resource protection priorities and identify primary park interpretive themes.

As stated in the park's 2002 General Management Plan, Voyageurs National Park is significant for the following reasons:

- The park's waterways include an important segment of the fur trade route used in the opening of northwestern North America.
- Located near the headwaters of the Arctic watershed of Hudson Bay, the park's lakes - - rather than land - - have been the primary travel route throughout history. The lakes continue to shape transportation and recreational uses of the area today.
- The park's exposed rocks and landscape exemplify the glacial activity of the Pleistocene epoch and some of the most complete and extensive Precambrian geologic features in the United States.
- The park preserves the timeless beauty of woods, rocks, water, and sky that invite people to renew themselves through a variety of outdoor activities.
- The designation of Voyageurs as a national park is integral to the protection of the boundary waters ecosystem by both the United States and Canada. Along with Quetico Provincial Park and the Boundary Waters Canoe Area Wilderness, Voyageurs was and remains at the heart of a major conservation effort to protect the boreal forest landscape, its interconnected waterways, and associated wildlife.
- The park holds vital evidence of the continuity of 10,000 years of human relationships with the environment uniquely dictated by the interconnected waterway system. The park provides an exceptional, largely unstudied storehouse of knowledge for the future and preserves resources associated with a long period of use, including those representing the Native Americans, fur trade, logging, and recreation.

Interpretive Stories

For each of the primary interpretive themes there are many compelling stories to be told. This section of the PL details some of the ideas that park staff have developed to express primary interpretive themes to park visitors. Park naturalists, interpreters, and volunteers should be familiar with these interpretive stories, and work to incorporate them into their programs.

Geology

The rocks of Voyageurs reveal a 2.8 billion year story of plate tectonics, continent building, and glaciation.

- Voyageurs' rocky landscape is a vividly solid foundation that connects people to the land and provides opportunities for rest, solitude, exploration, and recreation.
- Just as all living things develop over time, Voyageurs' rocks show evidence of different stages development that include evidence of 2.8 billion years of volcanism, continent building, and glacial activity.
- The prominent exposed rocks of Voyageurs allow first- hand discovery and connection with the geologic foundation of the earth.

Water

Voyageurs is a complex mosaic of interconnected lakes, ponds, and wetlands that shapes and sustains life.

- At Voyageurs, water defines life—in and around lakes, ponds, and wetlands.
- Water – the essence of Voyageurs National Park – provides outstanding opportunities for recreation that build personal connections and give meanings to places.
- Through wise stewardship, Voyageurs' waters sustain outstanding sport- fisheries and allow visitors to experience the ultimate fish story.
- The private dams at Kettle Falls and International Falls, which control the water levels of the park's main lakes, hold the story of a battle between industrial development and conservation of the border waters region.
- Travelers of a different kind, exotic species of fish, invertebrates, and plants, threaten Voyageurs' native aquatic communities and highlight the fragility of our wetlands.

- Along with Quetico Provincial Park and the Boundary Waters Canoe Area Wilderness, Voyageurs was, and is, at the heart of a major conservation effort to protect the boreal forest landscape, its interconnected waterways, and wildlife.

Scenery

Throughout the year, the timeless beauty of woods, rocks, water and sky invite people to renew themselves through a variety of outdoor activities.

Voyageurs & the Fur Trade

The voyageurs that traveled, traded, and wintered here were the backbone of a global system of trade that brought change to the people and environment they found here.

- Voyageurs, French- Canadian canoemen, demonstrated determination, commitment, and strength as they paddled the waters now in Voyageurs National Park to transport goods and fur pelts from 1732 to 1871.
- Ojibwe, beavers, and voyageurs – three important players of the fur trade story that provided the necessary components of a successful business.
- The routine of the voyageurs followed an annual rhythmic cycle of transporting trade goods and fur pelts.
- The interconnected waterways of Voyageurs influenced the development of the 4,000- mile long transport and supply system of the fur trade, making the region a strategic crossroads and transportation hub. Today, the small portion of the waterway in Voyageurs National Park offers visitors first- hand discovery of the magnitude of the voyageurs work.

Plants & Animals

Voyageurs is a place of transition where southern boreal forest and northern hardwood forests meet supporting biological diversity.

- At Voyageurs changes in wildlife abundance and diversity highlight natural and human- caused changes to the landscape and waterways.
- Voyageurs National Park has a great diversity of plants and animals living in a variety of distinctive natural communities that create opportunities for personal exploration, recreation, scientific discovery, and enjoyable learning.
- Winter, a time of extreme cold and long nights, forces wildlife, plants and people to adapt in order to survive.

- Visitors come to Voyageurs in search of large animals – moose, bear, and wolves - and end up discovering birds and other small wildlife that are an amazing and integral part of the park’s natural systems.
- Beavers modify the landscape and habitat in which they live to suit their needs, allowing people to discover first- hand how small actions can have big impacts.
- After hundreds of years of being trapped for their lustrous pelts, beavers are back and illustrate the essence of persistence and survival.
- A beaver’s life requires ingenuity and determination—it depends on hard work, building and repairing structures, and caring for family, just as many people do.

People

The place that is now Voyageurs National Park has attracted, challenged and sustained people over time, influencing their lifeways, traditions, and beliefs – as it does today.

- For 10,000 years, the area now in Voyageurs National Park has dramatically shaped the lives of people. Now the landscape offers us an opportunity to consider the powerful and spiritual ties between people and place.
- The names associated with lakes, islands, bays, and points provide opportunities for us to connect places with memories or thoughts of the people that have been attracted, challenged, and sustained by the unique resources of Voyageurs’ interconnected waterway system.
- The interconnected waterway system of Voyageurs National Park has attracted and challenged a succession of people for thousands of years, significantly influencing their lifeways, traditions, and beliefs – exemplifying how landscapes shape and influence human societies.
- At Voyageurs, glaciers carved an interconnected waterway that created a major cultural crossroads, resulting in a landscape of special significance to many people over thousands of years.
- Human use of this land and water has evolved over time from an economy based on resource extraction to an economy based on tourism and recreation, presenting us with the continuing challenge of balancing human use with resource preservation.
- Often surprised to see cabins in the park, visitors learn about the various types of land transactions that occurred after the establishment of Voyageurs National Park and can understand the effect on the families involved.

- As the last glaciers retreated from the Voyageurs landscape, plants, animals, and people arrived. This area has been the traditional homeland for many indigenous groups, most recently the Ojibwe.
- Mineral resources, especially gold trapped in greenstone formations, lured thousands of people with dreams of wealth to the border lakes in the late 1800s, resulting in profound changes to traditional lifestyles and influencing settlement patterns.
- Visitors can see the evidence and understand the economic potential of trees and wildlife in northern Minnesota that attracted timber and commercial fishing companies, and hunters and trappers after mining efforts failed.

Park Themes

Primary interpretive themes are ideas about park resources that the park would like each visitor to comprehend in order to better understand, enjoy, and care for the park. They are based on the park's legislation, mission, purpose, significance and primary resources. The following theme statements were developed by park staff and partners through a collaborative planning process to provide the core subject matter for all interpretation at Voyageurs National Park. The primary interpretive themes should be used to develop future personal services programs and interpretive media.

As visitors enjoy the resources at Voyageurs, it is the responsibility of the park staff and volunteers to provide opportunities for them to form intellectual and emotional connections to park resources. The interpretive themes are listed in the order that they appear in the park's legislation and significance statements. They are numbered for reference purposes.

1. Geology

The rocks of Voyageurs reveal a 2.8 billion year story of plate tectonics, continent building, and glaciation.

2. Water

Voyageurs is a complex mosaic of interconnected lakes, ponds, and wetlands that shapes and sustains life.

3. Scenery

Throughout the year, the timeless beauty of woods, rocks, water and sky invite people to renew themselves through a variety of outdoor activities.

4. Voyageurs & the Fur Trade

The voyageurs that traveled, traded with native people, and wintered here were the strength of a global system of trade that brought change to the people and environment they found here.

5. Plants & Animals

Voyageurs is a place of transition where the southern boreal forest and the northern hardwood forest meet and support diverse plant and animal species.

6. People

The place that is now Voyageurs National Park has attracted, challenged and sustained people over time, influencing their lifeways, traditions, and beliefs – as it does today.

Basis for Interpretation and Publications

Four main goals were identified for Voyageurs' Interpretation, Education and Publication program to help guide the future development of the program, and evaluate what the park has done to date. The four primary goals for interpretation and education are to:

1. Effectively orient visitors to the park.
2. Provide information for a successful visit that covers safety, stewardship, rules and regulation, opportunities, and pre-visit planning.
3. Provide opportunities for visitors to form intellectual and emotional connections to the park's resources, thereby facilitating understanding and appreciation.
4. Education the public about resource management issues and to facilitate informed stewardship.

Part 2: Partnerships

Park Partners

Voyageurs National Park works with a variety of partners to accomplish resource management, visitor enjoyment and interpretation goals. Park partners include federal, state, and local agencies, as well as a number of private organizations. This section of the PL lists the primary organizations that partner with the park regarding publications.

Lake States Interpretive Association

The Lake States Interpretive Association (LSIA) is the cooperating association that manages the retail operations at all three of the park's visitor centers. Additionally, LSIA provides important funds that support the publication of specific interpretive materials and provide support materials for interpretive functions.

The Friends of Voyageurs National Park

The Friends Group is a non-profit membership organization that supports park operations through sponsorship of events and funding projects such as wayside exhibits, park newspaper printing, and wildlife research. The Friends Group raises money through memberships, donations, and special fundraisers.

Voyageurs National Park Association

Voyageurs National Park Association (VNPA) is a membership organization that plays a variety of roles in interacting with the park. VNPA raises funds to support park interpretive and education projects, including managing the donations for the park newspaper and funding a portion of the printing costs for the newspaper. Opportunities to expand and improve the partnership between the park and VNPA should be pursued. This may include building support and raising funds for the park in the Minneapolis/St. Paul area.

Minnesota Department of Natural Resources

Voyageurs National Park has a general agreement with the Minnesota Department of Natural Resources (DNR) for cooperative management of park resources. Voyageurs' uses many of the DNR's publications for the park's roving program.

Gateway Communities' Tourism Bureaus

The tourism bureaus in the park's gateway communities financially support printing costs of the park newspaper, distribute park information, and promote lodging and other visitor services available in their communities. The Chief of Administration sits on the Board of Directors for the International Falls, Ranier, and Rainy Lake Convention and Visitors Bureau and attends monthly meetings. The four tourism bureaus are: Kabetogama Tourism Bureau, Ash River Commercial Club, Crane Lake Visitor and Tourism Bureau, and International Falls- Ranier- Rainy Lake Convention and Visitors Bureau.

Resource Partners

The following organizations partner with the Division of Resources Management at Voyageurs National Park to conduct research and review plans; they are a source of information for interpreters.

- Bois Forte Tribe - Minnesota Band of Chippewa
- Hibbing Community College
- Michigan State University
- Michigan Technological University
- National Park Service's Midwest Archeological Center
- Minnesota Department of Natural Resources
- Minnesota Historical Society
- Minnesota State Historic Preservation Office
- Natural Resource Research Institute
- The Nature Conservancy
- Northern Michigan University
- Ontario Ministry of Environment
- Science Museum of Minnesota
- University of Minnesota School of Forestry
- University of Minnesota - Duluth
- University of Minnesota - St. Paul
- University of North Dakota
- University of Wisconsin
- U.S. Environmental Protection Agency
- U.S. Fish and Wildlife Service
- U.S. Forest Service
- U.S. Geological Survey
- Vermilion Community College

Part 3: Audiences Identified

The audiences listed below are the identified user groups that frequent Voyageurs National Park and use publications.

1. Individuals/Families
2. Scholars/Researchers/Voyageur “Bufs”
3. Young Adults/Children/School Groups
4. Park neighbors/local residents

Part 4: Produced Publications

Free Publications Produced by Voyageurs

Publication Title	Publication Description	Publication Status
Park Newspapers		
Rendezvous	Park newspaper highlighting important information about the park, including trails, tours, maps, partners, camping, hot topics, local accommodations, etc.	Updated Yearly
Park Brochures		
Hiking Trails and Common Wildflower Checklist	Description of each hiking trail, including distance, access, and difficulty; a checklist of wildflowers found in the park	Completed in 2003
Boats on Interior Lakes Program	A guide to the boats and canoes available to visitors on the interior lakes of the Kabetogama Peninsula in Voyageurs National Park	Updated Yearly
What is there to do?	A guide to area attractions in and around Voyageurs National Park	Updated Yearly
Group Campsite Reservation System	Detailed information about the reservation process for the two group campsites	Updated Yearly
Voyageurs... Their History, Clothing and Canoes	An interpretive description of the voyageurs to commemorate their rich history	Completed in 2003
Special Speaker Series	A guide to the weekly special speaker programs offered throughout the summer season	Updated Yearly
Fall, Winter and Spring Programs	A guide to monthly programs offered by park staff during the fall, winter and spring months	Updated Yearly
Rainy Lake Gold Rush	Interpretive description of the gold rush on Rainy Lake and destination site on Little American Island	Completed in 2004
Vignettes of Time	An interpretive description of the historic people and places in Voyageurs National Park to commemorate the rich history of the area	Not to be renewed

Camping, Houseboating and Day Use Map	Detailed map of all use sites in Voyageurs National Park; not a navigational map	Updated every 2 years, last time 2008
Ellsworth Rock Gardens Self-Guided Tour	A guide to the trail and designated stops at the historic Ellsworth Rock Gardens; Map of site included	Completed in 2006
Black Bay Ski Trail	A guide to the Black Bay Ski Trail in Voyageurs National Park	Completed in 2001
Unigrid	Official Map and Guide	Updated every two years, last time 2008
Site Bulletins		
Introduction Site Bulletin	Interpretive information about the establishment, the past and the present in Voyageurs National Park	Completed in 2002
Geology Site Bulletin	Interpretive information about the geology in Voyageurs National Park	Completed in 2004
Climate Site Bulletin	Description of the typical climate in the area, including an average weather chart	Completed in 2003
Fauna Site Bulletin	A list of fauna in Voyageurs National Park	Completed in 2003
Flora Site Bulletin	A list of flora in Voyageurs National Park	Completed in 2003
Ernest Oberholtzer Site Bulletin	Interpretive information about Ernest Oberholtzer, an active environmentalist in the early 1900s	Completed in 2006
Meadwood Lodge Site Bulletin	Interpretive information about the historic Meadwood Lodge in Voyageurs National Park	Completed in 2008
Lake Best Management Practices and Spiny water flea Site Bulletin	Description of best management practices while boating in the various lakes and spiny water flea natural history	Updated yearly
Maps		
Kettle Falls site map	Map showing facilities and trails at the Kettle Falls destination site	Completed in 2003
Cruiser Lake Trail	Map showing Cruiser Lake hiking trail system; includes Anderson Bay loop	Completed before 2000
Locator Lake Trail	Map showing Locator Lake hiking trail system	Completed before 2000
Oberholtzer Trail	Map showing Oberholtzer hiking and snowshoeing trail system	Completed before 2000

Echo Bay Trail	Map showing Echo Bay hiking and skiing trail system	Completed before 2000
Kab- Ash Trail	Map showing hiking and skiing trail system	Completed in 2004
Booklets		
Junior Ranger Booklet and Certificate (9 & up)	Junior Ranger program with an emphasis on the voyageurs and the fur trade and wolves	Completed in 2006
Junior Ranger Booklet and Certificate (6 – 8)	Junior Ranger program with an emphasis on the Ojibwe and black bear	Completed in 2007
Junior Ranger Booklet and Certificate (5 & under)	Junior Ranger program with an emphasis on the beaver and scenery of Voyageurs National Park.	Completed in 2008
Newsletters		
Friends of Voyageurs National Park and Park Volunteers	A newsletter highlighting successes and events with the park volunteers and association	Updated twice a year
Park Newsletter; The Voyageur News	A newsletter highlighting success and events with the park	Updated twice a year
Other Publications		
Fish in the Interior Lakes	A list of all fish found in the interior lakes of the park	Completed before 2000

Free Publications Produced by Partners, Associations and Concessionaires

Publication Title	Publication Description	Publication Status
Brochures		
Lake States Interpretive Association	Description of goals and mission statement; membership form	Needs updating
Friends of Voyageurs National Park	Description of goals and mission statement; details of accomplishments; membership form	Updated in 2006
Voyageurs National Park Association	Description of goals and mission statement of organization; membership form	Updated in 2006
Kettle Falls Hotel	A guide to the Kettle Falls Hotel and Resort located in Voyageurs National Park; includes room and villa rates	Updated in 2006
Newsletters		
The Journal of Voyageurs National Park Association	A newsletter highlighting successes and events with the park and association	Updated twice a year

Free Publications Produced by other Organizations

Publication Title	Publication Description	Publication Status
Newspapers		
Junior Ranger Gazette	A newspaper supporting the Junior Ranger program of the NPS and encouraging youth learning in the National Parks; produced by the NPS, National Park Foundation, and Unilever	Updated Yearly
Brochures		
Federal Recreation Passes	A detailed description of all Federal Recreation Passes sold by the NPS	As Needed
Climate Change in National Parks	A description about climate change and actions to be taken	As Needed
Catch and Release Fishing	Promoting importance of and proper methods of catch and release fishing; produced by National Resource Program Center, Water Resources Division	As Needed
Wildland Fire in National Parks	Graphics and description of wildland fires in the National Parks; produced by National Interagency Fire Center	As Needed
Insects: Masters of Survival	Description of insects in National Parks, including biting and stinging insects	As Needed
Help Stop Aquatic Hitchhikers	An outline of simple actions to take to prevent and stop the spread of aquatic invasive species; produced by Minnesota Department of Natural Resources	As Needed
Minnesota Incident Management Teams	Description of Incident Management Teams; produced by the Minnesota Interagency Fire Center	Completed in 2007
Share the Experience	Publication describing the official Federal Recreation Lands Photo Contest	Updated Yearly
Eat Fish Often?	Description of mercury in fish and safe levels of fish consumptions; produced by the Minnesota Department of Health	As Needed
Site Bulletins		
Impacts of Midwest Warming	Interpretive information about climate change in the Midwest	Completed in 2007

Impacts of Warming on the Heartland	Interpretive information about climate change in the heartland	Completed in 2007
Pest Alert: Emerald Ash Borer	Flyer with detailed information about the identification, biology, distribution, and symptoms in relation to the emerald ash borer; produced by USDA Forest Service	Completed in 2006
Let's Get the Lead Out	Flyer describing the impacts of lead to wildlife and tips for anglers to help safeguard wildlife; produced by Minnesota Office of Environmental Assistance	Completed in 2000
Inventory and Monitoring Site Bulleting	Description of monitoring vital signs in the national park surrounding the Great Lakes; produced by Great Lakes Inventory and Monitoring Network	Completed in 2008
Booklets		
Minnesota Boating Guide	A summary of boating laws and rules in the state of Minnesota; produced by Minnesota Department of Natural Resources	Updated Yearly
Minnesota Fishing Guide	A summary of fishing regulations in the state of Minnesota; produced by Minnesota Department of Natural Resources	Updated Yearly
Snowmobile Regulations	A summary of snowmobile regulations in the state of Minnesota; produced by Minnesota Department of Natural Resources	Updated Yearly
Rainy Lake Vacation Planner	A booklet highlighting events, accommodations, services, and maps of International Falls, Ranier and Rainy River	Updated Yearly
Kabetogama Lake Vacation Planner	A booklet highlighting events, accommodations, services, and maps of the Kabetogama community	Updated Yearly
Ash River Trail Vacation Planner	A booklet highlighting events, accommodations, services, and maps of the Ash River community	Updated Yearly
Crane Lake Vacation Planner	A booklet highlighting events, accommodations, services, and maps of the Crane Lake Community	Updated Yearly

Non- Native Invasive Species in the Border Lakes Region	An identification guide to the non- native invasive species in the border lakes region; produced by the Friends of the Boundary Waters Wilderness	Updated in 2008
Hypothermia... The Cold Facts	Detailed information about hypothermia; produced by Minnesota Department of Natural Resources	Completed before 2000
Viral Hemorrhagic Septicemia	Information about this serious disease of fresh and salt water fish now found in the Great Lakes region; produced by Minnesota Department of Natural Resources	Unknown
Bird and Wildlife Viewing in Voyageur Country of Northeastern Minnesota	A guide to help visitors find locations to view the wildlife and birds of Voyageurs National Park and its surrounding areas	Completed in 2008
Rack Cards		
Watch and Alert Cards	Four cards with alert information about invasive species, including Rusty Crayfish, Spiny and Fishhook water flea, Emerald Ash Borer, and Gypsy Moth (4 total); produced by Minnesota Department of Natural Resources and Minnesota Department of Agriculture	Unknown
Zebra Mussels or Spiny water flea Cards	Index card highlighting states laws that apply at Zebra Mussel or Spiny water flea invested waters; produced by Minnesota Department of Natural Resources	Unknown
Recommended Minimum Ice Thickness	A card with rough guidelines for new clear ice thickness and basic ice tips; produced by the Minnesota Department of Natural Resources	Completed before 2000
Rack Cards		
Web Ranger	Information letting kids know of the NPS kid's website.	Updated in 2008
Danger: Thin Ice	Ice safety tips, breakthrough steps, vehicle escape; produced by Minnesota Department of Natural Resources	As Needed
Snowmobile Trail Map	A snowmobile trail map of Voyageurs National Park and surrounding area	Updated Yearly
Wear Lifejackets	Flyer outlining Minnesota lifejacket regulations for children; produced by the Minnesota Department of Natural Resources	As Needed

Maps		
Woodenfrog SF Campground Map	Information and site map for Woodenfrog State Forest Campground	Completed before 2000
Other Publications		
Resort Publications	Various resort publications distributed during the summer months	As Needed

Publications for Sale in the Sales Outlets within Voyageurs National Park

Publication Title	Publication Description	Publication Status
Books		
Gold Town to Ghost Town	Overview of the Rainy Lake Gold Rush	1993
VNP Book	Overview of the park	1987
VNP Water Routes, Foot Paths and Ski Trails	In- depth view of the parks trails, water routes, etc	1986
The Voyageurs –Grace Lee Nute	Life of the voyageurs	1987
The Illustrated Voyageur	Pictorial overview of the life of a voyageur	2007
Fort Lac la Pluie of the Northwest Company	In- depth view of the Northwest Fur Company	2006
Portage into the Past	Portaging and paddling along the US Canadian boundaries	1999
Rainy River Country – Grace Lee Nute	A story of the Minnesota boundary water country	1950
Birds of VNP	General information of bird species found in VNP, not a complete list	2001

Part 6: Proposed Publications

Publication Title	Publication Description	Publication Status
Newspapers		
Rainy Lake City Journal	A re- creation of the Rainy Lake City Journal to hand out at the Rainy Lake Visitor Center and Rainy Lake City	
Brochures		
Discovery Sites	An interpretive description of the Garret, Kukola and Fujita cabins	
Rainy Lake City	A walking guide to RL City	
Boating Guide on the Fur Route	A boaters guide to the fur trade route	
Rainy Lake Museum Brochure	A walking guide through the Rainy Lake museum display	
Visitor Destinations	A visitors guide to the destinations within the park	Completed 2009
Walking Guide to Historic Kettle Falls	A walking guide for visitors who wish to explore the historic Kettle Falls and Dam on their own	
VIP brochure for recruitment	How to apply, what is a VIP, etc., hand out for the three visitor centers	Completed 2009
Paddle Site brochure	A list of routes, description and map of routes and campsites, locations of put- ins	
Site Bulletins		
Mittet Cabin	An interpretive and information handout at the site and at visitor centers	
I.W. Stevens	An interpretive and information handout at the site and at visitor centers	
Oveson Fish Camp	An interpretive and information handout at the site and at visitor centers	
Casaretos	An interpretive and information handout at the site and at visitor centers	
Camp Marston	An interpretive and information handout at the site and at visitor centers	
Hoist Bay	An interpretive and information handout at the site and at visitor centers	

Ingersoll Estate	An interpretive and information handout at the site and at visitor centers	
Fact Sheet		
Firearm laws in VNP	Information of the regulations within VNP	
Firewood in the park	Information of the regulations within VNP	
Exotics and park mgmt strategies on interior lakes fact sheet	Information of the regulations within VNP	Completed 2009
Viral Hemorrhagic Septicemia fact sheet	Information of the status and regulations within VNP	
Rusty Cray Fish fact sheet	Information of the status and regulations within VNP	
Other		
Kettle Falls placemats	Informational and Interpretive placemats for the dining hall	
Kettle Falls inserts	Various publications on KF and inserted into purchase bags at the cash register	
Kettle Falls bookmarks	Bookmarks with interpretive message on them	
Kettle Falls trivia cards	Trivia cards for the dining hall tables, veranda and bar
