Subject Tenaya Lake Plan

YOSEMITE NATIONAL PARK

To,? from YNPS Planning.

I was under the impression from Jen that the Yosemite Transportation Plan was next up in the planning review sequence. Why the change?

Extending the comment period will likely not get any more responses than you have already gotten. The "public" is on "information overload" with news about pending economic failure, an election to nowhere, hurricanes, wildfire, Indian casinos, local government issues, etc.

Peoples basic needs are being threatened. Hence planning issues in Yosemite are way down on personal priority lists.

My suggestion; suspend YNPS planning until after these other things are past. I think I know why it is important to you and the future of Yosemite to keep pushing but I would like to know for sure. Please have someone from Planning contact me.

Thanks,
